THE TEAM OF THE TREBEREI!

STRIVE WITH US TOWARDS ENJOYMENT!

¹ sTREBER is a pun combining the German words for “spent grains” and “study hard” and is therefore a convincing slogan for our company.

1. EXECUTIVE SUMMARY

Every year 30 million tons of spent grain are produced in breweries all over the world. The sad news: the majority of this great resource is simply thrown away! Our mission: we recycle the valuable spent grain into healthy foods, putting an end to this food waste! We are the "TREBEREI," the 14-member team of the Junior Company at BG/BRG Stainach. We offer THE innovative and sustainable product that no pasta shelf should do without: spent grain pasta!

We are rethinking conventional pasta! We start where brewing ends. By using our ingenious raw material we have created a unique product. Our spent grain pasta is the sustainable and delicious solution to recycle the excess by-product from the brewing process into valuable food and make an important contribution to recycling management. Our pasta comes in different varieties at market prices. Spent grain pasta is a healthy protein and fiber marvel!

The Treberei is Austria's only producer of organic spent grain pasta.

By combining spent grain with regional, organic-certified ingredients in our products we clearly stand out from our competitors. Scientific laboratory studies confirm the healthy ingredients of spent grain that are retained in our products.

Through regular sales at regional markets and participation in trade fairs in Liezen, Vienna, and Riga we were able to address many customers in a short time. You can find our pasta on the shelves of many organic markets as well as at SPAR, BILLA, and BILLA Plus. We achieve a high repurchase rate, as we successfully collaborate with Austrian top chefs who create exclusive pasta recipes for us.

We target a clearly defined audience: health-conscious individuals who prefer organic products and value reducing their ecological footprint.

Our website www.treberei.com, together with our online shop, as well as our pitches at events like the "Social Business Hub Styria" and the "Elevator Pitch" of JW Steiermark, made us known beyond the region. We attract attention through consistent social media presence and intensive PR work.

With 3.603 products sold (as of May 31, 2024), we have so far generated a net revenue of €14.099,06 and a profit of €6.424,26. Our cash flow is 46%. Our shareholders can currently look forward to a dividend yield of 803%.

2. TREBEREI

THE ASPIRING COMPANY ON THE PASTA MARKET

2.1 We are striving towards success!

We founded our company in fall 2023. Full of energy we spent the previous year preparing for market entry: taking the entrepreneurship exam, obtaining the Business English Certificate, attending workshops on project and process management with FH Joanneum, and a team-building weekend with our coach.

Intensive research and meetings with a food designer were crucial in prompting us to start early on the production of sustainable food. The refinement of our ideas was facilitated by the Business Model Canvas and input from innovation expert DI Andreas Rehklaue.

During the development of prototypes for three different ideas over the summer holidays it became clear to us: We want to make a significant contribution to reducing food waste by producing food from brewers' spent grain!

Our final product idea emerged in fall 2023 during our discussions and experiments with master baker Markus Trafella. Almost instantly the brilliant idea was born: we would develop innovative recipes for pasta made from brewers' spent grain!

As "Trebererei" we produce protein- and fiber-rich pasta in collaboration with pasta producer Dominik Reichart in Bad Zell. In line with the EU's sustainability goals, we actively contribute to reducing food waste. We guarantee high-quality and regional products. We source our fresh, steaming brewers' spent grain from Schladminger Brewery and organic eggs and organic durum wheat semolina from organic farmer Markus Riemelmoser.

OUR sTREBER-MOMENTS IN THE DEVELOPMENT PROCESS:

-  Application of Methods for Idea Generation (Business Model Canvas, Brainstorming, etc.)
-  While working on our business plan, we focused on the USP of our product. As a team, we dealt with aspects such as process planning, target-oriented marketing strategy including persona, market analysis, sales strategies, competitor and SWOT analysis, and a detailed projected profit and loss statement.
-  Prototype Development: We tested various products made from brewers' spent grain, such as muesli bars, protein balls, cookies, and gingerbread, but faced issues with the durability. Therefore, we ultimately decided on long-lasting pasta.
-  Initial drying attempts of brewers' spent grain in our own kitchens were unprofitable due to the immense time and energy required. At the research facility in Raumberg, we use professional drying ovens, and experts there provide us with their expertise.
-  BIOS Biokontrollservice Austria carefully inspected our forms, products, production rooms, and storage for several hours, which made us realize how demanding the process of organic certification is. Since November 13, 2023 we have been proud holders of the organic certificate AT-BIO-401 for organic farming and labeled products.

2.2 The delicious products of the Treberei

Kuddelnudel (330g)

These organic spent grains tagliatelle are a real treat in combination with one of the 10 TOP sauce recipes from our award-winning chefs. These tagliatelle make every palate sing!

Price 3,80 € incl. Tax

Strudelnudel (500g)

The spiral noodles in our range are a unique flavor twist!

sTREBERisch organic! sTREBERisch good!

Price 4,20 € incl. Tax

NEW! Rotundelnudel (500g)

The newest variety in our range is the rotunda noodles, unusual name? Unusually good!

Price 4,20 € incl. Tax

All our pasta is made following the same tasty recipe: Double organic durum wheat semolina, organic eggs and organic spent grains.

For special occasions, we also produce special editions such as cookies, protein balls or bars made from brewer's grains.

TOP sauce recipes from top Austrian chefs The ultimate add-on for our customers

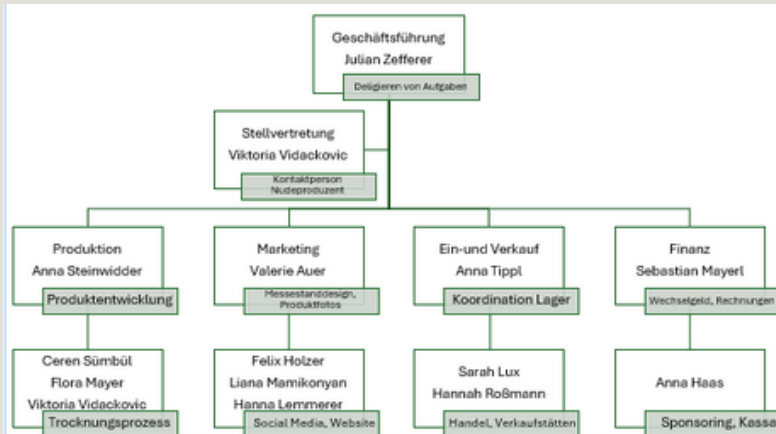

We achieve high customer loyalty through a unique collaboration with top chefs from Austria: Via QR code on the back of each Treberei pasta package customers can access sensational sauce recipes, exclusively developed for us. Diligent buyers of our pasta can currently recreate ten different recipes by Gottfried Prall, a chef at the Imlauer Hotel Schloss Pichlarn, Viktoria Fahringer, Austria's youngest top chef, and Stefan Ell-Mayer, awarded two toques by Gault Millau. The perfect flavor combination of Treberei beer pasta and top chef recipes delights every palate.

3. TEAMWORK MAKES THE DREAM WORK

Motivation was palpable throughout the entire team from the beginning. However, our "Junior fire" truly ignited on the evening of our opening ceremony. The enthusiastic reaction of our guests showed us that our customers can hardly wait to indulge with us in the delights of sTREBERn! Our own joy in the product, the immense customer interest, successful pitches to experts, and victories at competitions and trade fairs finally ignited the fire in all fourteen team members!

At every team meeting it is evident: everyone is passionate about their tasks and committed to the team and shared success. We are indeed true sTREBERs! Strong cohesion, ambition, and dedication characterize our teamwork.

sTREBER-MOMENTS IN THE TEAM

At the beginning of our Junior year some conflicts arose because responsibilities were not clearly defined. Simply assigning tasks to departments was not sufficient. We had to establish who is responsible for which tasks and by when they need to be completed. These are documented in our weekly meeting minutes and discussed and reviewed at the beginning of each meeting.

Our meetings are prepared online on MS Teams by the management and department heads at least three days prior to the scheduled date.

3.1 The management

Julian Zefferer and Viktoria Vidackovic were entrusted with this task after presenting their goals and visions. They impress with their expertise and are capable of motivating the entire team. Their main responsibilities include planning the weekly meetings, delegating tasks, and organizing various meetings with potential business partners and investors. Julian and Viktoria together create the foundation for an open and honest exchange within the team through their cooperative leadership style.

STREBER-MOMENTS OF THE MANAGEMENT

- 💡 The role of management is associated with a lot of responsibility and time commitment. This requires good time management as Year 11 at a grammar school in Austria, one year prior our A-levels, is already challenging with its enormous workload.
- 💡 Important decisions need to be made quickly. Meetings are always clearly planned, therefore an overview can be guaranteed.
- 💡 In cases of team conflicts, it is important to have an open ear. That is why the CEOs regularly offer employee meetings to resolve challenges.

3.2 The production team

Anna Steinwiddler, Flora Mayer, Ceren Sümbül, and Viktoria Vidackovic are the driving forces in production. They initially delved deeply into the core ingredient, beer spent grains, consulted food experts, and researched numerous reports on the uses of spent grains.

We handle the drying process and the production of the fine spent grain flour ourselves. The production team's task is to plan the processes perfectly and to train all employees.

For the demanding drying and milling process, which takes place at the HBLFA Raumberg-Gumpenstein, we receive support from a specialized staff member. This support is essential as the process, due to its several-hour duration, cannot be entirely supervised by ourselves.

The produced spent grain flour is shipped to our pasta producer, Dominik Reichart from "Bad Zeller Eierhof" in Upper Austria, where our three pasta varieties are made.

Additionally, we continuously work on new ideas and are responsible for product development.

STREBER-MOMENTS OF THE PRODUCTION TEAM

- 💡 Through precise production plans organizational challenges were effectively resolved.
- 💡 We chose regional partners to obtain high-quality raw materials.
- 💡 During the initial production 250kg of beer spent grains became moldy due to lack of experience. Through thorough research we were able to establish precise guidelines for the drying and milling process to avoid this issue in the future.
- 💡 We always ensured to produce sufficient quantities of all varieties to quickly and satisfactorily meet our customers' demands.

Wow! **WE HAVE BEEN ABLE TO SAVE 2 TONS OF SPENT GRAINS SO FAR!**

3.3 The marketing team

Our marketing team, led by Valerie Auer, Hanna Lemmerer, Liana Mamikonyan, and Felix Holzer, tirelessly strives to inform our target audience about the quality, sustainability, and uniqueness of our products through both traditional and digital media channels. With a great deal of creative energy and dedication, the team embodies our motto: "Nobody can resist the ingenious products of Treberei!"

Our market analysis, which was conducted in three local supermarkets before entering the market, revealed significant interest in our products. Particularly important to the respondents were the following points: 34% emphasized the importance of regional sourcing, while another 24% prioritized sustainability. Additionally, the high protein and fiber content provided added value for 65% of respondents. In another survey conducted during our opening event, where 96% of participants belonged to our main target audience, 100% indicated that they would recommend our products.

We keep our sTREBER customers updated on social media platforms such as Instagram, Facebook, TikTok, YouTube, and LinkedIn. With our professional commercials and amusing product and team videos we provide entertaining marketing. Our renowned top chefs and ski star Tamara Tippler help us expand our reach by featuring our products on their Instagram channels.

Current information can be found on our company website, and the online shop allows for convenient shopping from anywhere. Maintaining a constant presence in schools is achieved through witty posters, an internal sTREBER treasure hunt, contests, and sales booths for special occasions like Valentine's Day or Mother's Day. We also enhance our visibility by participating in and pitching at various events across Austria.

sTREBER-MOMENTS OF THE MARKETING TEAM

- 💡 The recognition value increases through a consistent corporate design in the design of packaging, advertising materials, online presence, and sales booths.
- 💡 Consistent presence on social media, in newspapers, and at the location is essential. The more creative, the more effective.
- 💡 Product policy: Based on expert feedback we revised the design of our packaging because it did not sufficiently reflect the unique selling proposition of our products. It is important to put ourselves in the shoes of the customers to achieve optimal marketing.

3.4 The purchasing and sales team

The sales department, consisting of Anna Tippl, Sarah Lux, and Hannah Roßmann, is responsible for the timely procurement of raw materials as well as the distribution of finished products. Our core responsibilities are the printing of EAN codes for retail, labeling and warehouse organization. We organize sales booths in schools as well as at markets and trade fairs. We negotiate with officials from SPAR and REWE and finalize contracts.

Since the opening ceremony we have been present at numerous local Advent and Easter markets. Our products have been available on the shelves for regional products at SPAR, BILLA, and BILLA PLUS since February/March 2024.

We also reach our target groups by positioning ourselves in organic stores such as the Farmer's Shop and BIO-Trio in Gröbming, Grabnerhof Farm Shop, and Lechnerhof Farm Shop in Rottenmann. Our online shop, www.treberei.com/shop, allows our customers to conveniently order our pasta varieties anytime.

Recently, the gourmet kitchens GH Mayer in St. Martin and Imlauer Schlosshotel Pichlarn, as well as the Falstaff-awarded restaurant Walters in Gröbming, have begun offering Treberei pasta dishes on their menus. The product presentation in these exceptional establishments has a highly promotional effect on sales.

STREBER-MOMENTS OF THE PURCHASING AND SALES TEAM

- 💡 The uniqueness of our raw material, beer spent grains, requires explanation, which is why direct sales at markets by our team were particularly successful.
- 💡 We have experienced that listing in retail chains requires months of negotiation and planning.
- 💡 Through extensive sales experience we have significantly improved our communication with customers. Now, we know exactly which information resonates with customers and catches their interest.
- 💡 The positive feedback from our customers concerning our unique idea makes us especially proud.

3.5 The finance team

For Sebastian Mayerl and Anna Haas the profitability of the company is a key concern. In addition to selling shares (80 shares at €10 each) their initial tasks included conducting a SWOT analysis, preparing a projected income statement (Plan-GuV), and calculating the break-even point. They calculated costs for materials, tools, labor, outsourced production, operating expenses, and marketing initiatives. Our contribution margins for our Strudel noodles and Rotundel noodles are €2.08, and for our Kuddel noodles, it is €2.00.

Our "daily business" includes meticulous accounting, monthly income and expense calculations, monitoring account balances, tracking incoming payments, and settling outstanding invoices.

STREBER-MOMENTS OF THE FINANCE TEAM

- 💡 The completed entrepreneurial exam provided us with the necessary know-how to create the financial plan at the beginning of the year. So, all the hard work paid off! Accuracy and diligence are essential in the finance department.
- 💡 Together with our business expert and tax advisor Michael Reiter we were able to clarify questions regarding key business metrics and review our results.
- 💡 Current negotiation discussions with potential investors are challenging.

3.6 CSR - sustainability at all levels

The social aspect of sustainability is also important to us. Since autumn 2023, as part of a collaboration with Gröbming Elementary School, we have been passing on our entrepreneurial experiences to younger students. Five team members, in coordination with Principal Daniela Warter and form teacher Mag. Franz Maurer, conduct business workshops with the nine year old primary school children. With our support the pupils successfully manage their Mini Junior Company called "Holzerei."

4. THE "STREBER" FUTURE VISIONS

We have truly become dedicated sTREBERs! Current food trends and the extremely high demand for our products confirm that we are on the right track.

Part of the team is planning to continue Treberei after the end of the Junior project. We are still striving: Soon we will introduce laser-engraved beer spent grain lasagna sheets featuring company logos and slogans. Additionally, we have been negotiating with three potential investors for several months and are in contact with the Styrian foundation center "Gründerzentrum der Steiermärkische Sparkasse". Heinrich Prokop has offered to assist us with the continuation of our business. Furthermore, we have been consulting the Austrian Patent Office to find options to protect our brand.

5.0 FINANCIAL REPORT

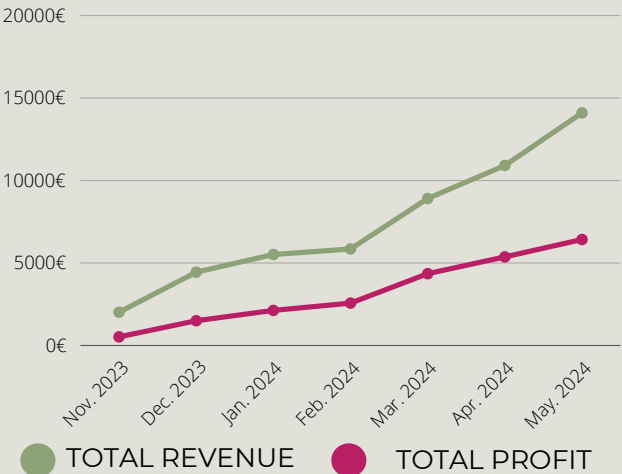

5.1 Key business figures

Revenue (incl. sponsoring money)	14.099,06€
Profit	6.424,26€
Profitability (=Cashflow) ⁵	46%
Dividend for equity investors	803%

5.2 Sales figures⁶

Product	Sold units	Totalsales in €
Strudelnudel	1707 Pac.	6.394,00€
Kuddelnudel	1405 Pac.	4.767,27€
Rotundelnudel	491 Pac.	1.874,73€

5.3 Development of total sales and profit (preliminary)

5.4 Target-actual comparison

	Target	Actual	Difference
Revenue	10.044,44€	14.099,06€	4.054,62€
Expenses	6.278,04€	7.674,80€	1.396,76€
Profit	3.766,40€	6.424,26€	2.657,86€

Items	EUR
1. Net revenues	13.149,06€
2. Other income: Sponsorships ¹	950€
3. Operating services	14.099,06€
4. Costs of materials and other production services	
a. Total cost of materials	118,20€
b. External services ²	7.035,71€
5. Other operating expenses	
a. Marketing	75,32€
b. Distribution	57,99€
c. Other expenses ³	239,18€
d. Internal personnel costs ⁴	148,40€
6. EBT (=Earnings before taxes)	7.052,99€
7. Other interest and similar income	0,00€
8. EBIT (=Earnings before taxes and interests)	7.052,99€

These annual financial statements are confirmed by economic expert Michael Bauhofer.

Liezen, 31.05.2024

Place, Date| Signature

1 Sponsorship funds were used for participation in the ISCF 24 in Riga and the international trade fair in Vienna.
2 This includes materials invoiced by our pasta producer.
3 It also includes expenses for HACCP training for employees and for obtaining the organic certification.
4 A one-time payment of €10 gross / €8.55 net per employee was made to illustrate the taxes that need to be paid. We are aware that the level of salary payments does not reflect reality.
5 Since our Junior Company has no non-cash expenses, cash flow and revenue profitability are equal.
6 This breakdown only includes figures for our main products. Special editions are not listed separately.

Successfully sTREBERed!
